

38500 BUTTSEAMER

The model 38500 is currently being used to sew soft carpet, finished carpet, carpet tiles, conveyor belting, fiberglass and a variety of other materials. The 38500 sews an overedge of approximately 1 1/2 inches when the seam is pulled out flat. The seams made by the 38500 are consistently flat. The model 38500 is our heaviest duty machine and can be electrically or air driven. The air driven machines have a speed control to allow operators to speed up for light jobs or slow down for sewing heavy finished carpet.

For more information about the 38500 or any of our machines contact:
