

Model 9500 Cross Cutter

The model 9500 cross cutter uses the same twin blade scissors action principle of cutting as our proven trimmers and slitters. The model 9500 cross cutter is powered by a 3 horse power motor and driven by #60 roller chain or a poly chain belt. The blades are manufactured from the same type steel as our trimmers and slitters, so blade resharpener will be rare. The cross cutter will cut across 12 feet of carpet in approximately 2-3 seconds. The cutter utilizes four blades to provide two directional cutting. The model 9500 cutter is proving to be a fast and reliable machine for cross cutting carpets and other textile products.
